Cleanser

There are many different types of cleansers available on the market. Some are designed for dry skin, while others are for oily skin. It's important to choose a cleanser that suits your skin type and is gentle enough to use twice a day. Cleansing is a crucial step in any skincare routine as it helps to remove dirt, oil, and makeup from the surface of the skin. This prevents clogged pores and reduces the risk of acne and other skin conditions. When choosing a cleanser, look for ingredients like salicylic acid or glycolic acid, which can help to exfoliate and keep your skin clear. Always remember to use a gentle touch and rinse thoroughly with lukewarm water.

Toner

Toner is a liquid or lotion applied to the skin after cleansing. It helps to balance the skin's pH, remove any remaining traces of cleanser, and prepare the skin for the next steps in your skincare routine. Toners can also provide hydration and contain ingredients that help to soothe and calm the skin. Some toners are specifically formulated to address issues like redness or sensitivity. It's important to choose a toner that is alcohol-free and fragrance-free if you have sensitive skin. Applying toner with a cotton pad or your hands can help to ensure even coverage. Consistent use of toner can lead to clearer, more balanced skin.
